

# Neuromagic Capsule

## Product Details

*The Neuromagic Capsule is a dietary supplement designed to support various aspects of health, particularly focusing on nerve health, inflammation reduction, and overall well-being. The formulation includes a blend of scientifically-backed ingredients, each contributing unique benefits.*

**Below are the detailed components of Neuromagic Capsule:**

\*\*\*\* Micronized PEA (Palmitoylethanolamide) – 600 mg

**Function:** PEA is an endocannabinoid-like lipid mediator known for its anti-inflammatory, analgesic, and neuroprotective properties. It helps modulate immune responses, supports brain health, and reduces chronic pain and inflammation.

**Benefits:** Research indicates that PEA can enhance mood, improve cognition, support muscle recovery, and alleviate symptoms related to allergies and neurodegenerative conditions. It has been shown to be well tolerated with minimal side effects

\*\*\*\* R-alpha Lipoic Acid – 100 mg

**Function:** R-alpha lipoic acid (RLA) is a powerful antioxidant that plays a crucial role in energy metabolism and cellular protection against oxidative stress. It is both water- and fat-soluble, allowing it to function throughout the body.

**Benefits:** RLA supports healthy blood sugar levels, improves nerve function, and may help alleviate symptoms of diabetic neuropathy. Its antioxidant properties also contribute to cardiovascular health and cognitive function

\*\*\*\* Benfotiamine – 200 mg

**Function:** Benfotiamine is a synthetic derivative of vitamin B1 (thiamine) that enhances thiamine levels in the body. It is particularly effective in treating conditions related to vitamin B1 deficiency.

**Benefits:** This ingredient is known for its potential to improve nerve health, alleviate pain associated with diabetic neuropathy, and may also have positive effects on mental health in individuals with alcohol dependence

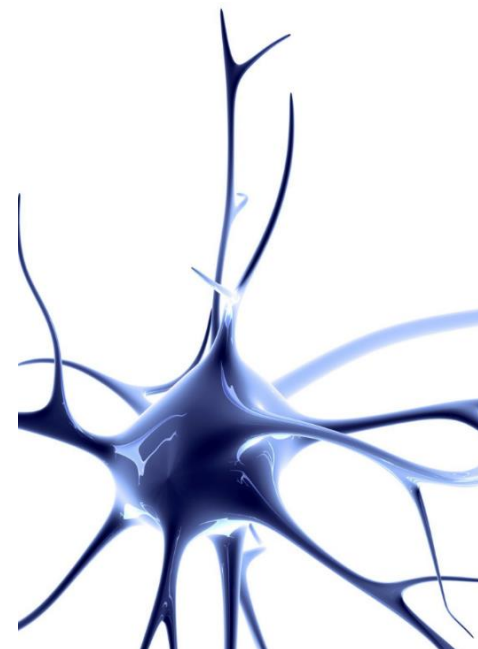

\*\*\*\* Mecobalamine – 0.5 mg

**Function:** Mecobalamine is an active form of vitamin B12 that plays a vital role in nerve health and regeneration.

**Benefits:** It has been shown to improve nerve conduction velocity and promote the regeneration of injured nerves. Mecobalamine may also provide analgesic effects for conditions such as diabetic neuropathy and other neuropathic pains

\*\*\*\* Liposomal Turmeric Root Extract – 100 mg

**Function:** Turmeric contains curcumin, which has potent anti-inflammatory and antioxidant properties. The liposomal delivery

system enhances its bioavailability.

**Benefits:** Turmeric is known for its ability to reduce inflammation, support joint health, and improve overall immune function.

\*\*\*\* Acetyl-L-Carnitine (ALC) – 150mg

**Mechanism:** ALC is known for its neuroprotective properties. It helps in the repair and maintenance of nerve cells by promoting the synthesis of acetylcholine, a neurotransmitter essential for nerve function<sup>2</sup>.

**Benefits:** ALC has been shown to alleviate pain and improve nerve function in patients with peripheral neuropathy.

**Synergistic Effect:**

**Combined Use:** Studies have demonstrated that the combination of ALC and PEA has a synergistic effect, meaning that together they are more effective than when used separately. This combination has been shown to significantly improve pain and nerve function in patients with neuropathies secondary to rheumatic disease

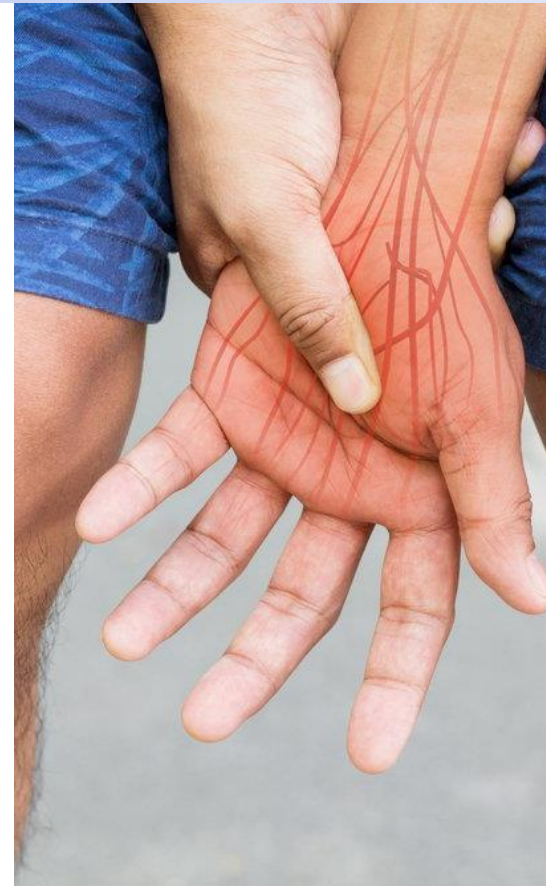

\*\*\*\* Bioperine – 5 mg

**Function:** Bioperine (black pepper extract) enhances the absorption of various nutrients through its ability to inhibit certain enzymes that metabolize drugs.

**Benefits:** This ingredient significantly increases the bioavailability of curcumin from turmeric and other compounds in the Neuromagic Capsule.

Other Ingredients:

Hypromellose – Silicon Dioxide
